## On Arrival

- Select as flat and level a parking site as possible. Use leveling blocks if required.
- Ensure the solar panels are not covered by shade as then they will not charge the 12V battery properly.
- Connect 240V electricity *if applicable*
- Connect city water *if applicable*
- Connect greywater *if applicable*
- Ensure LPG gas bottle is open
- Turn on button 1-3 on the Battery and Water Control Panel
- Turn the water pump on, if not connected to city water
- Turn the hot water heater on using either 240V or LPG gas.
- Ensure the refrigerator (in auto mode) switch to either 240V or LPG gas.
- If using LPG gas, turn the refrigerator fan on.

Ensure that the rooftop solar panels are not covered by shade.

**Please note!** If using LPG gas, it can take up **20 minutes** before the fridge turns on.

The refrigerator must be level and will not operate if not parked on a flat surface.
